

# Materials Management MMOG/LE Training

## Using the MMOG/LE as a continuous improvement tool

Learn to use the Global Materials Management Operations Guideline/Logistics Evaluation (MMOG/LE) for optimal materials delivery performance!

Explore opportunities on how this user-friendly guideline can be used for a best-in-class materials management process. Using the MMOG/LE as a Continuous Improvement Tool training will help you to easily meet your customer requirements with ease and teach you how to proactively review your materials practices, ensure compliancy to the industry standard and attain the support needed for a first-rate materials management system.

As the global standard for the automotive industry, the MMOG/LE provides a common set of business procedures for the materials management function. OEMs and suppliers use the Global MMOG/LE principles to save time and costs, while helping to ensure effective, efficient management of materials. Implementation of this standard can produce tremendous benefits, including up to:

- An 85 percent reduction in premium freight.
- An 80 percent reduction in obsolescence costs.
- A 43 percent reduction in inventory carrying costs.
- A 20 percent reduction in data entry time.
